## 0.3 mm Pitch, 1.2 mm above the board, Top and bottom Contact, Back-Flip actuator Flexible Printed Circuit ZIF Connectors

## FH39 Series

## Features

1. Low-profile 0.3 mm pitch connector with top and bottom contact
Usable via either its top or bottom contact point, this connector achieves enhanced freedom in terms of the product design.
2. High contact reliability thanks to the spring terminal structure
Because both top and bottom contact points are springloaded, the contact point adapts to the FPC motion, and high contact reliability is ensured.
3. Delivered with the actuator open

FPC can be immediately inserted without the need for the opening of the actuator.
4. Easy FPC insertion

Entry chamfers at all sides of the FPC insertion slot assure correct insertion and positioning of the FPC.
5. Accepts standard FPC thickness
0.2 mm thick standard Flexible Printed Circuit (FPC) can be used. This is the only ultra-low profile ZIF connector using standard FPC.
6. Conductive traces on the PCB can run under the connector
No exposed contacts on the bottom of the connector.
7. Board placement with automatic equipment

Flat upper surface and tape and reel packaging facilitate vacuum pick-up and placement.
Standard reel packaging contains 5000 connectors.
8. Halogen-free*
(FH39J Series)
*As defined by IEC61249-2-21
Br -900ppm maximum, Cl -900ppm maximum,
$\mathrm{Cl}+\mathrm{Br}$ combined-1,500ppm maximum

Note 1 : The coplanarity of each terminal lead within specified dimension is 0.1 mm Max.
2 : Packaged on tape and reel only. Check packaging specification.
3 : Slight variations in color of the plastic compounds do not affect form, fit or function of the connector.
4 : After reflow, the terminal plating may change color, however this does not represent a quality issue.

## Recommended FPC construction

## 1. Using Single-sided FPC

FPC : Flexible Printed Circuit

## 2. Using Double-sided FPC <br> FPC : Flexible Printed Circuit

* To prevent release of the FPC due to its bending, use of the double sided FPC with copper foil on the back side is NOT RECOMMENDED.

## 3. Precautions

1: This specification is a recommendation for the construction of the FH39 Series FPC ( $\mathrm{t}=0.2 \pm 0.05$ ).
2: For details about the construction, please contact the FPC manufacturers.

In individual applications the actual temperature may vary, depending on solder paste type, volume / thickness and board size / thickness. Consult your solder paste and equipment manufacturer for specific recommendations.

## Connector Operation and Precautions

## Operation

Exercise care when handling connectors. Follow recommendations given below.

## 1. As delivered

Delivered with the actuator open. There is no need to operate the actuator prior to the insertion of the FPC.

## 2. FPC insertion

Align the FPC perpendicular with the connector and insert it firmly all the way.

## Operation

## 3. Locking

After FPC/FFC insertion, rotate the actuator down to a full stop, pushing it at the center.

## 4. FPC removal (Lock release)

Carefully rotate the actuator up to $90^{\circ}$, lifting it at the center.

* The actuator opens by rotating it in the direction OPPOSITE to the direction of the insertion of the FPC. DO NOT attempt to open it from the same side as the insertion of the FPC.

## Precautions when mounting connectors on the PCB

## -Handling before mounting on PCB

Insertion of the FPC or operation of the actuator prior to mounting on the PCB is NOT RECOMMENDED.

## -PC board warpage

Minimize the warpage as much as possible. The connector is straight within 0.1 mm max. Make sure that the mounting area flatness can accept the connector terminals without causing any failure of the solder joints.

## -Forces on the board

$\diamond$ When braking the large PC board into individual boards exercise care NOT to damage the installed connectors.
-When attaching the boards or other components with the screws make sure that any stresses will NOT cause board deflections affecting the mounting areas of the connector.

## Other precautions

## -When hand soldering:

Do not perform hand soldering with the FPC inserted in the connector.

- Do not apply excessive heat or touch the soldering iron anywhere other than the connector leads.
- Do not use excessive amount of solder or flux compounds.

Operation of the actuator or contacts may be affected by excessive amounts of solder or flux compounds.
